

Adding RSS feeds to the Calendar and Feeds gadget in your I-Google page

In this first example we are going to add an RSS feed from the BBC website to the Calendar and Feeds gadget in your I-Google Page.

Firstly go to the BBC RSS feed page [here](#)

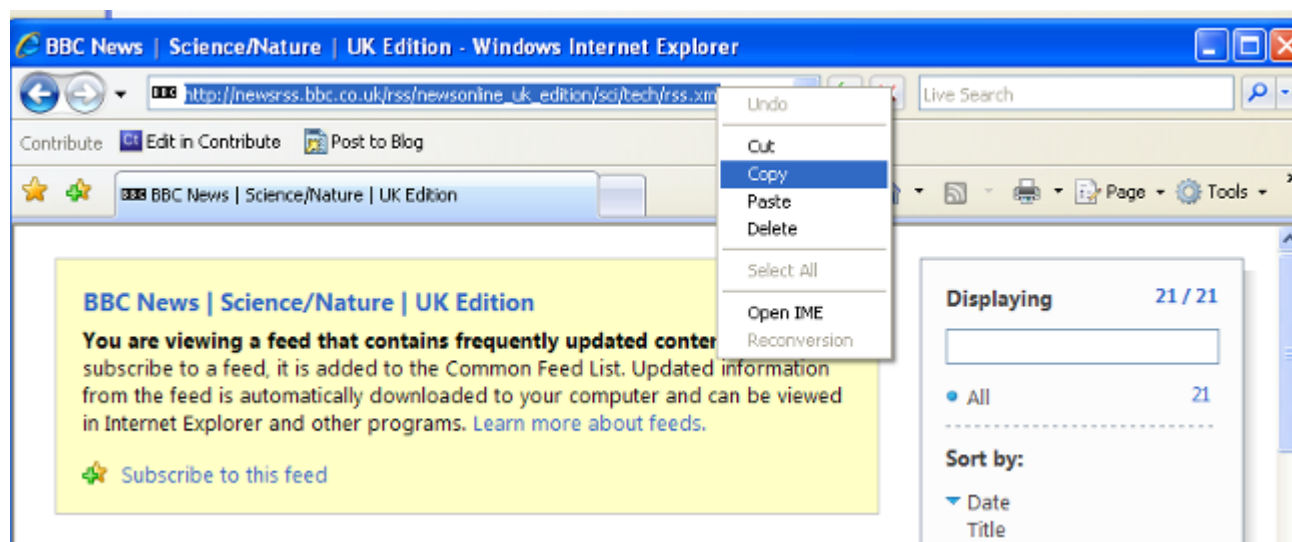

This page provides information about RSS feeds and also a list of all the news story feeds available from the BBC website.

Next you need to either pick a feed yourself or click on link below which will take you to the RSS feed for Science.

http://newsrss.bbc.co.uk/rss/newsonline_uk_edition/sci/tech/rss.xml

A screenshot is available on the next page.

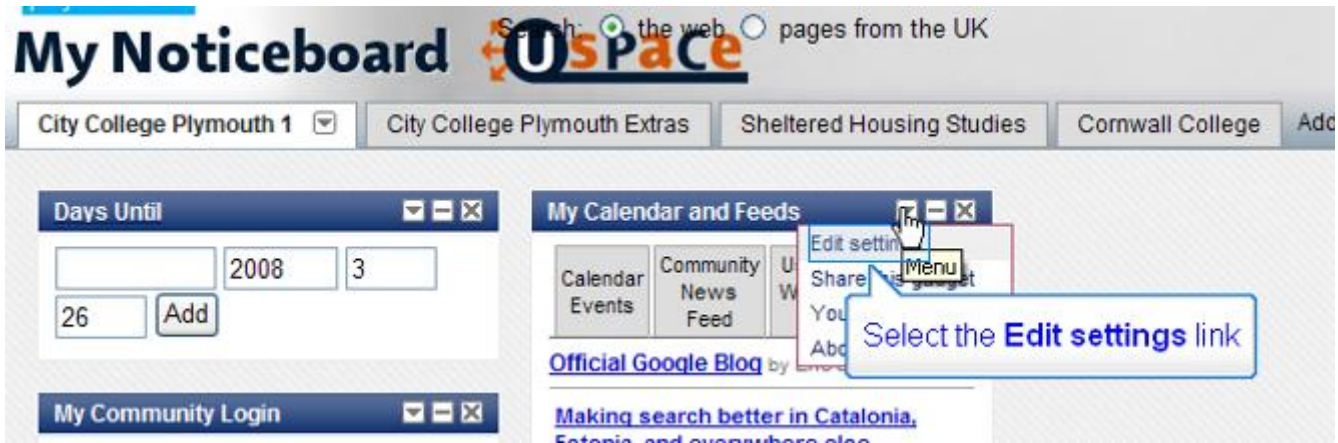

- You then need to highlight the address by clicking in the address bar and pressing CTRL + A
- Then right click over the address and press Copy or simply press CTRL + C

Once you have copied the link you need to go to your I-Google page.

- You then need to click the leftmost button at the top right of the MY CALENDAR and FEEDS gadget.

- A small menu should appear. Click on the Edit Settings link (The first one)

A number of settings fields should then open. This gadget can contain up to 4 news feeds. Some of these are already set up for you such as the calendar feed, you should leave these as they are.

You can see on the right the settings that are available. You are able to change a number of them to customise the number of items displayed, font size etc.

Tab Font Size	0.7em
Feed Descriptions	<input checked="" type="checkbox"/>
Feed 1: URL	http://www.google.com/calendar/feeds/rob%40uspace.org.uk/private-3c4a788771f45d7a4a...
Feed 1: Title	Calendar Events
Feed 2: URL	http://www.uspace.org.uk/community/news/rss/
Feed 2: Title	Community News Feed
Feed 3: URL	http://www.google.com/calendar/feeds/developer-calendar@google.com/public/basic
Feed 3: Title	UsPaCe Website Blog
Feed 4: URL	http://googleblog.blogspot.com/atom.xml
Feed 4: Title	Google Blog
# of Entries	5
Summaries	short
Render HTML	<input checked="" type="checkbox"/>

You now want to paste in the address we copied earlier of the BBC news feed. You should paste into the **Feed 4: URL box**. You can then change the title in the **FEED 4: Title** box to something like BBC Science News Feed. When you have done this press **SAVE**

Feed 4: URL	http://newsrss.bbc.co.uk/rss/newsplayer_uk_edition/sci-tech/rss.xml
Feed 4: Title	BBC NEWS SCIENCE / TECHNOLOGY
# of Entries	4
Summaries	short

Once you have pressed save you should then be able to see the news feed displayed in your page similar to below.

[BBC News Player | Sci-Tech](#)

[Firm offers space burials](#)

A US company based in California is offering burial services on the Moon.

[26 March 2008 06:21:18]

[Canada seal hunt controversy](#)

Canada's annual seal hunt is set to begin, despite calls for this controversial practice to be stopp

[26 March 2008 07:39:09]

[Antarctic ice shelf break-up](#)

A chunk of ice the size of the Isle of Man has started to break away from the Antarctic, scientists
