My Messages (0)

My Feeds

My Profile

What is it and what can you do with it?

My portfolio is one of the most important parts of My Community. It allows you to create your own pages. There are two ways you can use these pages:

An Electronic Portfolio

One way is to create your own electronic portfolio. So instead of keeping things on various files and sheets of paper you are able to keep this information together in My Portfolio. This way it is available online for editing or access anywhere. This would also allow you to share this information with other people if you so wish.

Group Work WIKI

Another useful way you can use My Portfolio is for collaborating on group work. You can create pages that other members of your group can edit or contribute to. This is particularly good for working on ideas etc!

What else to consider?

As with everything you create on My Community you should consider who you want to share your resources with. You can choose to restrict access to your Electronic portfolio to certain people for example your tutor.
