

## #6 My Messages

### What is it and what can you do with it?

This part of “My Community” allows you to send messages to other people on the system quickly and easily. You simply choose the person you want to send a message too from a list so you don’t even need to know an email address. You also have other useful standard features such as viewing sent message etc.

### What else to consider?

You may want to make sure you have Receive email notifications on in your [account settings](#) . That way if someone sends you a message, posts a comment on something, etc, you will receive an email to let you know. You can find your account settings in the top right hand corner above the search box.
